

Pursuit of leadership in the online services market while implementing high standards for workspace security.

Organization:
Internet Services

Location:
Taiwan

Application:
Security and video
surveillance

Axis partner:
ADT Security

Mission

As the most influential online medium in Taiwan, the company continues launching various innovative and reputed online services for individuals and businesses, paying close attention to its workspace security as well, in order to protect more than 1,000 employees, confidential information, and important facilities on a 24/7 basis.

Solution

AXIS P3301 Fixed Dome Network Cameras are set up throughout the new office building, including every conference room, elevator, entrance, exit, and hallway for effective protection of employees and facilities.

Result

The IP-based Axis network video solution helps security personnel at the company very rapidly access and review video streams on any issue to enable effective prevention and issue resolution. Moreover, the solution enables real-time monitoring of night shift security guards on duty and keeps audio/video records of customer complaints to help resolve disputes.

"Our adoption of the Axis network surveillance solution that supports H.264 compression helps our security personnel directly access and review video streams on any issue to rapidly target any suspicious incident or person, enabling effective prevention and issue resolution. Even when I am off from work, I can stay at home and access the company surveillance system in real-time to monitor night shift security guards on duty."
